EXPERIENCES

Toolio - Full Stack Developer

📅 June 2021 - Current 📍 New York, Usa

- Worked as full stack developer on Toolio which is a successful startup automizing merchandising workflows
- Migrated legacy Vue code to Composition API and Typescript
- Added a visualization feature which works on both time and attribute dimensions
- Worked with high volume of data, optimized performance and memory usage of critical work flows for customers
- Built numberless API endpoints for GraphQL and created migration scripts
- Experienced in very basic Azure operations
- On front end side used Vue.js along with Composition API, Vuetify, Typescript and Jest for testing
- Used both Datadog and Sentry for tracing

Pitcher AG - Full Stack Developer

📅 March 2020 - June 2021 📍 Zürich, Switzerland

- Pitcher AG is a sales enablement platform which provides solutions for sales reps on iPad, Android and Web
- On-boarded some of the important customers like Reckitt Benckiser and Sandoz to the web platform by creating their UI and integrating Salesforce data to Pitcher
- Built several applications with Vue.js to be deployed to the native IOS and Android app.
- Involved in initial testing, QA to bug fixing phases, lots of customer meetings.
- Used PHP on backend operations on an Amazon S3 database.
- Created cron jobs to sync customers information with Salesforce.
- Also got experienced on HTML, CSS, JQuery, JavaScript.

Internships

Wireless Systems, Networks and CyberSecurity Lab

📅 May 2019 - September 2019 📍 Ankara, Turkey

- Deployed a P4 load balancer to an Inventec D10056 switch.
- Wrote a configurable network traffic generator to test the load balancer with different traffic characteristics on Python.

Endoks

📅 July 2017 - September 2017 📍 Ankara, Turkey

- Created a RESTful application by IBM's LoopBack and Node.js, where customers' product information is checked at certain intervals and customer is informed by an sms according to the product's state.

EDUCATION

Bachelor's Degree - Computer Engineering

Middle East Technical University

📅 September 2013 - July 2019 📍 Ankara, Turkey

PROJECTS

See some of my Vue and React projects here:

Social Media App For Municipals

📅 December 2019 - Unfinished

- Municipa is a social media app for municipals and its people developed using Flutter and Firebase
- Users can create posts, see other posts in three sections(Popular, Recent, Near) and vote other posts.
- A small demo can be seen here , Github repository can be seen here

Winspeed Network Load Balancer

📅 September 2018 - June 2019

- WinSpeed is a session based load balancer which aims to distribute the incoming network traffic across a group of back-end servers efficiently.
- WinSpeed is deployed to an Inventec D10056 switch in July 2019 and tested with different network traffics.

COMPUTER SKILLS

- JavaScript, Vue.js, React, Typescript
- Node.js, PHP, Python
- MySQL, GraphQL, Firebase
- Vuetify, Mui
- Git
- Linux, MacOS, Windows
