

Onur Özdemir

Senior Full Stack Developer

📍 Turkey ✉ oozdemironur@gmail.com ☎ +90 506 906 01 71 🌐 in/onurozdemir23 🐙 github.com/oozd

SUMMARY

Full Stack Developer with 6+ years of experience building scalable, high-performance web and mobile applications using React, Vue.js, TypeScript, and Node.js. Strong background in cloud-based architectures, mobile development, and end-to-end product ownership. Proven ability to modernize legacy codebases, optimize performance, and deliver production-ready, user-focused solutions.

WORK EXPERIENCE

Toolio

Senior Full Stack Developer

New York, NY

June 2021 – Present

- Led the migration of a large Vue 2 codebase to Vue 3 using the Composition API and TypeScript, significantly improving maintainability, scalability, and developer productivity.
- Optimized data-intensive workflows, reducing client-side memory usage by up to 40% and improving rendering performance for high-volume datasets.
- Designed and implemented 200+ GraphQL API endpoints and migration scripts.
- Deployed and managed serverless functions on Azure, automating workflows and enhancing scalability.
- Implemented application monitoring and error tracking using Datadog and Sentry, improving observability and reducing production issues.
- Implemented unit and integration tests using Vitest and Jest, improving release stability and code quality.

HomeVet (Independent Project)

Co-founder / Full Stack Developer

October 2024 – Present

- Built and launched a cross-platform mobile application using React Native and Expo, delivering a complete booking flow on both iOS and Android platforms.
- App targets pet owners booking in-home vet visits; public website available at homevetapp.com which includes google play store and ios app store links.
- Designed and integrated Supabase for authentication, relational database management, edge functions, and file storage.
- Delivered end-to-end product ownership across auth, booking flows, push notifications, and app store deployment on iOS and Android.

Pitcher Ag

Full Stack Developer

Zurich, Switzerland

March 2020 – June 2021

- Onboarded key clients, including Reckitt Benckiser and Sandoz, by developing custom UIs.
- Integrated Salesforce into Pitcher for enhanced functionality.
- Developed and deployed Vue.js-based mobile applications for iOS and Android environments.
- Contributed across the full SDLC including QA, client-facing demos, and production deployments.
- Developed backend functionality using PHP and SQL-based data storage, and implemented scheduled cron jobs to synchronize customer data with Salesforce.

EDUCATION

Middle East Technical University

Bachelor of Science: Computer Science

Ankara, Turkey

2013-2019

SKILLS

Frontend: React, Vue.js, JavaScript, TypeScript, React Native, Expo

Backend: Node.js, GraphQL, REST APIs, PHP, Python

Database: SQL, MySQL, Firestore

Tools: Git, Datadog, Sentry, Jest, Vitest

Cloud: Azure, Supabase, Firebase

AI Tools: Cursor, Copilot, Claude

LANGUAGES

- **English** - Fluent, **Turkish** - Native
