

Onur Özdemir

Senior Full Stack Developer

📍 Turkey ✉ ooze23@gmail.com ☎ +90 506 906 01 71 🌐 in/onurozdemir23 🐙 github.com/ooze

SUMMARY

Full Stack Developer with 5+ years of experience building scalable, performant web and mobile applications. Strong expertise in React, Vue.js, TypeScript, Node.js, and cloud-based architectures. Proven track record improving application performance, modernizing legacy codebases, and delivering product-focused solutions in collaborative environments.

WORK EXPERIENCE

Toolio

Senior Full Stack Developer

New York, NY

June 2021 – Present

- Upgraded Vue 2 codebase to modern Vue 3 standards using Composition API and TypeScript, resulting in improved code maintainability.
- Optimized data-intensive workflows, enhancing performance and memory efficiency.
- Designed and implemented various GraphQL API endpoints and migration scripts.
- Deployed and managed serverless functions on Azure, automating workflows and enhancing scalability.
- Utilized Datadog and Sentry for application performance monitoring and error tracking.
- Conducted testing using Vitest and Jest.

HomeVet (Self-initiated Startup Project)

Co-founder / Full Stack Developer

October 2024 – Present

- Built a mobile app from the ground up using React Native with Expo for both iOS and Android platforms.
- App targets pet owners booking in-home vet visits; public website available at homevetapp.com which includes google play store and ios app store links.
- Developed and integrated Supabase for authentication, database, edge functions, and file storage.
- Designed and implemented end-to-end features, including user registration, authentication, reservation flows, notifications for at-home veterinary appointments.

Pitcher Ag

Full Stack Developer

Zurich, Switzerland

March 2020 – June 2021

- Onboarded key clients, including Reckitt Benckiser and Sandoz, by developing custom UIs.
- Integrated Salesforce into Pitcher for enhanced functionality.
- Deployed applications with Vue.js for native IOS and Android platforms.
- Participated in all phases of development, including initial testing, QA, bug fixing, and customer meetings.
- Utilized PHP for backend operations on an Amazon S3 database and created cron jobs to synchronize customer information with Salesforce.
